

# Handing-over Certificate

---

## Hydraulic compactor

**To the Epiroc Customer Center!**

**To dealers!**

**To the customers/users!**

The Handing-over Certificate is an important document for the subsequent processing of warranty claims.

The warranty period starts on the date of handing-over. It is in the interests mainly of the purchaser/user that the original handing-over certificate is in the possession of the manufacturer, Construction Tools GmbH, as without it warranty claims cannot be processed.

The data and checks required in the handing-over certificate are intended to provide Construction Tools GmbH and the Epiroc Customer Center with basic information and specifically with information about the operating settings of the tool in question. As this information is of importance for subsequent warranty decisions, you are requested to complete the handing-over certificate carefully.

You are kindly requested to make three copies of the signed form.

The purchaser/user keeps one copy. The second copy is for the distributor, the third copy for the Epiroc Customer Center and the original for Construction Tools GmbH.

Please send to the following address:

Construction Tools GmbH  
Abteilung Parts & Service/Technical Department  
Helenenstraße 149  
45143 Essen

# Handing-over Certificate HC 150 - HC 1050

## 1. Information about purchaser/user, excavator and installation
