MIMICO

TAKE CONTROL.
GET MORE DONE.

All-new CASE B Series skid steers build on more than 50 years of engineering and field experience to provide the most intuitive operator interface and environment ever designed in a CASE skid steer. The new design simplifies operation and puts more power and control into the hands of the operator.

Match that with productivity-enhancing horsepower and torque, powerful auxiliary hydraulics, industry-leading visibility, and lift geometries and size classes for every job—and CASE B Series skid steers will improve your earthmoving and material handling operations.

- + Industry-leading visibility for greater awareness
- + Powerful breakout forces for groundwork
- + Spacious, easy-to-enter cab
- + All-new, simple electro-hydraulic controls for operator preference
- + Optional auto ride control allows speed dependent activation for efficient handling of materials over rough terrain
- + Maintenance-free Tier 4 Final emissions solutions
- + Extreme attachment compatibility
- + We've retained the strength and styling of the frame from the previous series, and have re-engineered many of the critical inner workings of the machine to stand up to the hard work and extreme environments you face every day.

SIMPLIFIED OPERATION. MORE CONTROL.

INDUSTRY-LEADING VISIBILITY

Excellent forward sightlines, low threshold, reinforced skylight, cab-wide rearview mirror, large rear window and standard 360° lighting package give operators excellent views of the bucket or attachment, over the tires and all around the machine, day or night.

CASE skid steers have never been easier or more intuitive to operate. The all-new 8-inch LCD multi-function display puts critical machine information at the operator's fingertips, and the new backup camera significantly improves jobsite awareness. New joysticks, simple electro-hydraulic controls and easier start-up and throttle controls* all improve the operator experience.

- + Simple start-up procedure
- + Easy switching between operating patterns (ISO and H)
- + Industry-exclusive split screen backup camera/data display
- + Excellent controllability with electro-hydraulic controls
- + More comfortable joysticks
- + Creep Speed enhances attachment operation

TIER 4 DONE RIGHT, MADE EASY.

One solution does not fit all. CASE carefully considered each machine's application, life expectancy, maintenance needs and operators. That's why every CASE skid steer loader features a proven Tier 4 Final solution tailored for that model. The result? Compliance without compromise or complexity.

CASE Tier 4 Final-certified equipment is easier to maintain and, unlike competitive models, won't require you to master additional maintenance procedures. In fact, most CASE machines have maintenance-free emission solutions, so you can stay focused on your work—not maintaining your machine.

CASE Tier 4 Final Solutions in Simple Language

CEGR

What it means: Cooled Exhaust Gas Recirculation. For Tier 4 Final, it works with a combination of the after-treatment technologies listed here.

What it means to you: As an in-engine system, CEGR requires no operator maintenance or management. CEGR is included in all CASE skid steer loader models.

DOC

What it means: Diesel Oxidation Catalyst. The DOC oxidizes the machine's exhaust to create heat and manage emissions.

What it means to you: DOC is a maintenance-free solution—no fluids to add and no filter to replace.

DPF

What it means: Diesel Particulate Filter. The DPF captures particulate matter and burns off the captured particulate matter through a combustion process known as "regeneration." DPF is a less expensive solution, which helps keep the unit price down and why CASE chose this solution only in our smaller, price-sensitive units.

What it means to you: This solution allows customers the option of equipment with lower upfront costs. Some regeneration results in excess fuel burn and the DPF requires long-term maintenance and filter replacement costs.

SCR

What it means: Selective Catalytic Reduction. It's a simple after-treatment solution that combines DEF (Diesel Exhaust Fluid) with exhaust to convert emissions into nitrogen and water. DEF is a non-toxic liquid that reacts with engine exhaust in the presence of a catalyst to perform the emissions conversion.

What it means to you: Because SCR is an after-treatment system, it lowers exhaust temperatures and does not require unproductive fuel use associated with burning off particulate matter—great for larger engines. This offers a significant reduction in fuel use and has no DPF to replace. Keeping it running is simple—just refill DEF as needed. Fuel savings, lower maintenance costs and greater productivity will help lower total operating costs for the life of the machine.

HARD WORK MADE EASY.

MORE SPACE, MORE COMFORT

At nearly three-feet wide, CASE skid steer loaders have one of the roomiest ROPS/FOPS-certified cabs in the industry. New controls and a refined interior design provide even more legroom. And enclosed cabs are fully sealed and pressurized to reduce noise and dust. Options include Bluetooth radio, climate controls and a heated seat.

LOWER LOADER STOPS FOR GREATER GRADING

The load belongs on the chassis. A CASE innovation, all CASE loaders offer a low loader frame support to help properly transfer the load to where it belongs: the chassis. Plus, interchangeable spacer "pucks" allow for arm-height adjustment to accommodate various tire diameters and attachment height requirements.

ECONOMY MODE & ENGINE PROTECTION

Set shutdown timers to limit idling, engage the ignition timeout feature to limit battery drain, and leverage the engine protection capabilities to shut down the machine and protect the engine from conditions that may cause greater downtime.

POWERSTANCE FOR STEADY STRENGTH

A long, broad wheelbase gives you stability you can feel. This improves weight distribution, enables you to lift larger loads and reduces back-jolting, load-spilling bounce when hauling so you can retain more material and experience a faster, more comfortable ride.

CREEP SPEED OPTIMIZES ATTACHMENTS

Set machine travel at a consistent speed and independently operate the throttle power to the attachment for optimal performance not tied to machine speed in applications such as cold planing, sweeping and snow blowing.

ELECTRO-HYDRAULIC CONTROLS

Dial the machine in to meet the demands of each application with all-new electro-hydraulic controls available through the 8-inch LCD multi-function display. Adjust general machine responsiveness to high, medium or low; or dive deeper to individually adjust tilt, lift and drive speed, as well as loader arm and control aggressiveness.

MATCH THE LIFT TO THE TASK.

The CASE B Series includes both radial-lift and vertical-lift models. The benefits depend on your application. That's why CASE offers both lift patterns in various sizes to make sure you have the right machine for the job.

VERTICAL LIFT

Vertical-lift machines are engineered for lift-and-carry and truck-loading jobs. The geometry of the dual arm allows the load to rise directly up, providing maximum reach at full height. Vertical-lift machines are ideal for reaching over the side of and into the middle of high-side trucks.

RADIAL LIFT

Radial-lift machines are engineered for digging, prying and pushing. The angle of the arm ties directly into the chassis for superior strength when digging and pushing. It also provides maximum reach at the operator's head height, making it perfect for loading and unloading pallets from trucks.

RESIDENTIAL CONSTRUCTION

Working around homes and other contractors? User-friendly electro-hydraulic controls can adjust sensitivity for precise maneuvering. Industry-leading visibility, including the all-new backup camera, provides clear sight lines to the front, sides and rear of the machine. It all results in simpler, more productive operation.

CASE
CONSTRUCTION

SINCE 1842

BUILDING A STRONG CASE.

Since 1842, at CASE Construction Equipment we have lived by an unwavering commitment to build practical, intuitive solutions that deliver both efficiency and productivity.

We continually strive to make it easier for our customers to implement emerging technologies and new compliance mandates.

Today, our global scale combined with our local expertise enables us to keep customers' real-world challenges at the center of our product development.

The vast CASE dealers' network is always ready to support and protect your investment and exceed your expectations, while also providing you with the ultimate ownership experience.

Our goal is to build both stronger machines—and stronger communities. At the end of the day, we do what's right for our customers and our communities so that they can count on CASE.
