MIMICO

**“THE WHOLE PROCESS
WAS SMOOTH, THE GEAR’S
PERFORMING WELL, AND
IT’S GREAT KNOWING
WE’VE GOT A LOCAL TEAM
BACKING US UP.”**

- Benjamin Sinclair - Precision ReadyMix Ltd | Waikato

MIX UNIFORMITY GUARANTEED

CESCO CONCRETE MIXERS

Cesco Australia has been the leading name in concrete mixer manufacturing for over 50 years. Backed by decades of engineering excellence, Cesco's mixers are trusted by the most recognised names in the pre-mixed construction industry across Australasia.

At the heart of every Cesco mixer is a purpose-designed die-pressed blade system, engineered with a precise pitch and spiral to deliver consistent, high-quality mixing. Combined with our standard use of high carbon Rheemalloy wear resistant steel in both the blades and barrel shell, Cesco mixers offer up to **20% greater durability than general grade mild steel**, ensuring extended life and reliable performance on every job.

MIMICO proudly partners with Cesco Australia to supply and support this proven range of mixer units in New Zealand, equipping local operators with reliable and efficient concrete solutions.

GENUINE PARTS. NATIONWIDE SUPPORT.

MIMICO stocks a comprehensive range of Cescor concrete mixer parts to suit 6m³ and 7m³ units. This includes replacement barrels for Cescor and competitor brands, 4mm Rheemalloy blades, steel rollers, swivel and extension chutes, hydraulic filters, control panels and AgiCon remotes. With expert support at all of our branches, we're equipped to supply, fit and maintain the parts that keep your mixer running at its best.

FULL REBUILDS AND REPAIRS, DONE LOCALLY

IN-HOUSE ENGINEERING.

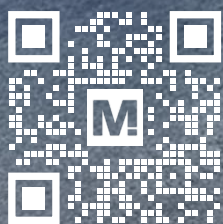

MIMICO offers full in-house engineering and workshop support from our Auckland and Christchurch branches. Whether you're refurbishing a single unit or fitting out an entire fleet, our team can manage everything from structural repairs to full barrel replacements.

Our services include:

- Barrel and chute replacements
- Rear assembly modifications to suit Cesco components
- Re-blading and wear part replacements
- Chassis repairs and custom mounting
- Professional paint and blast work (Auckland site includes a dedicated paint booth)

We also support fleet customisation to suit your operation. Mixer units are available ex-stock in white, with indent options offered in fleet colours at no extra cost. All mounting work is completed by our experienced team in either Auckland or Christchurch, ensuring consistent quality and local support.

ONLY MIX WITH THE BEST.
